

EMC + SIPI Symposium Is Almost Here

As participants get ready for the upcoming [EMC+SIPI 2024 Symposium](#), which will be held August 5-9, 2024 in Phoenix, Ariz., they can plan their schedules with the help of the Advance Program. Among the recent updates to the program are details on the Boeing Technical Tour, the ANSI C63.4 and C63.25 workshop, the Welcome Reception and Evening Gala, and new exhibitors.

Another recently announced highlight is the IEEE EMC Society's Women In Engineering (WIE) event, which will feature a WIE panel discussion on "Artificial Intelligence: What Motivates the Women in Engineering at INTEL?" with the following speakers:

- Nikita Tiwari, senior AI enabling engineer, Client Computing Group, INTEL
- Neethu Elizabeth Simon, senior software engineer, Network & Edge Group, INTEL
- Joyce Weiner, principal engineer, AI Software Architecture, INTEL

This panel of semiconductor industry engineering experts has over 50 years of combined experience. From data science to software to artificial intelligence (AI), hear how they have navigated their demanding careers while juggling their personal lives and giving back through their community leadership. Ask your questions during the interactive section.

Other interesting events scheduled for the 2024 symposium include:

- EMC+SIPI Jeopardy!

This is described as Trivia, with a Twist! This event is great at building your expertise in EMC+SIPI as well as providing a welcoming, informal environment to network with YP (young professional) colleagues and experienced professionals alike. Additionally, some guest speakers will share their experience and insights in volunteering within IEEE EMC Society, the Best Student Paper candidates will be highlighted, and the newly selected 2024-2025 EMC Society Young Professionals Ambassadors will be announced.

- "After the Welcome Reception" YP Event

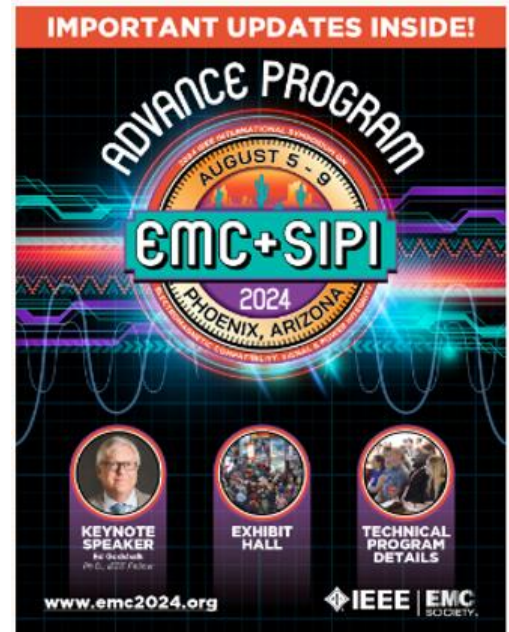

Get to know your fellow Young Professionals in a casual, informal setting after the Welcome Reception. Networking games are planned to help YPs get to know one another, and to gain a better understanding of the EMC Society. Drinks and appetizers will be served.

- Senior Member And Fellow Elevation Event

Being a Senior or Fellow Member is a prestigious honor within the IEEE community. It signifies your accomplishments and expertise in your field. But how do you apply for these elevations in membership? Do you qualify for the next level? At this informal meeting you can quickly learn about elevating your current IEEE membership to the Senior or Fellow category. Have your current resume readily available. Refreshments will be provided.

There are many other interesting events on the schedule and the conference program overall presents numerous incentives to attend every year. Conference organizers, have compiled the following list of "Top Ten Reasons To Attend The EMC+SIPI 2024 Symposium In Phoenix, Arizona":

- Participate in 200+ technical sessions
- Experience the keynote presentation, "The Story of the Transatlantic Telegraph and the World's First Internet," by Ed Godshalk, Ph.D., IEEE Fellow

- Enhance your knowledge of SIPI during the NEW Global SIPI University
- Accelerate your understanding of EMC & SIPI at the Clayton R. Paul Global EMC University
- Learn about the latest and future global standards during Standards Week
- Visit the exhibition hall to learn about new technologies, instrumentation and solutions
- Participate in *live* experiments and demonstrations and attend the "Ask the Experts" panel discussions
- Join exciting technical tours during the symposium week!
- Network with friends and colleagues at the many social events
- Bring the family and experience Phoenix, Arizona, in the stunning southwest Sonoran desert!
